## CENTRIX III THERMAL HEATED PRESS

Manufactures I.G. Units up to 7' x 10'

Power Requirements: 220 Volt, single phase 40 Amp service.

Save 50% or more on your sealed unit costs using the CentrixIII Thermal heated press. Gain a competitive advantage while improving your customer service giving you the ability to tap into new markets and increase your profit by 100%. Very clean and easy to use one step system, with fast cycle time to heat and press a sealed unit. The press heats up quickly and contains thermostatically controlled heaters which are well insulated to conserve energy.

The CentrixIII press is certified by Truseal for use with Duraseal sealant.

Other benefits of the centrixIII press

- \* Improved Thermal ratings
- \* roller bed for insertion and removal of each sealed unit
- \* variety of air spaces with simple one handed centrix adjustment
- \* Rear may be opened for pass through units
- \* Steel platens for faster pressing on Duraseal and other tape products
- \* Quick set up for Triple pane and stained glass sealed units.
- \* Grids and muntin bars are easily inserted.

Truseal and Duraseal are Registered Trademarks.
