L - FRAME HARP STORAGE RACK HE-600 SPECIFICATIONS SHEET

L-Frame Harp Storage Rack in 50 Slot rack size and is used for storage of cut glass lites for processing into IG Units. The floor is flat with glass handling controlled by a single set of dividing vinyl covered harp strings. Rack base and back vertical members are welded construction, arms are bolted to the vertical back and the harp strings are vinyl tube covered. Slots are 5/8" wide for glass sheet storage. Harp strings are removable so that vinyl tubing can be replaced when it becomes worn. Racks are stackable to ten high for economical shipment. Rack is mounted on four casters (two swivel & two fixed) and one (1) floor lock and flooring consists solid slab of HDPE for glass contact surface.

Rack is shipped with arms, harp strings and casters removed. Assembly only requires the installation of four (4) casters and the bolting on one of the two arms plus installation of the covered harp strings. All hardware required for assembly is included.
